

TECHNICAL LIST

PRO-MERINO

DESCRIPTION:

Our winter socks are engineered to deliver maximum thermal comfort while maintaining high mechanical durability. Thanks to the optimal blend of materials and structural design, these socks retain the natural benefits of Merino wool and offer exceptional longevity. The knitting technology, which uses a continuous central yarn without interruption zones, combined with reinforced high-stress areas through layered construction, is unique and ensures outstanding mechanical resistance and extended durability.

SIZES:

EU	36-37	38-39	40-42	43-45	46-47	48-50
UK	3-4	5-6	7-8	9-10	11-12	13-15

MATERIALS:

- **50% Merino wool** – A naturally antibacterial fiber with excellent moisture absorption. Provides warmth and comfort.
- **45% Polypropylene** – A reinforcing yellow/green fiber that ensures durability and long-lasting performance of the sock.
- **5% Elastane** – Guarantees elasticity and a perfect fit to the shape of the foot.

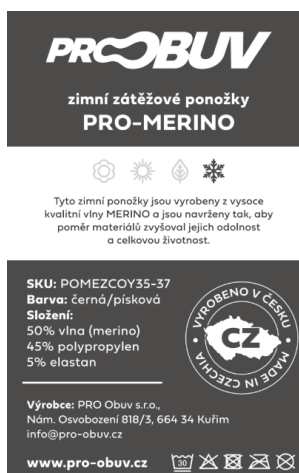

KEY PROPERTIES:

- **Durability** – Enhanced sock durability achieved through a well-balanced material composition while preserving the natural benefits of Merino wool.
- **Excellent moisture absorption** – The socks efficiently absorb moisture, helping to keep feet dry.
- **Warmth** – A high Merino wool content ensures excellent thermal regulation and keeps feet warm.
- **Antibacterial** – Merino wool is naturally antibacterial, helping to eliminate odors.

MAINTENANCE SYMBOLS:

LABEL IN ACCORDANCE WITH EU STANDARDS 1007 a 988:
